

Grip It® Oil

Grip It® Oil is a seamless knitted nylon liner with two layers of nitrile coating maximising handling ability in both wet and oily conditions. This highly versatile glove utilises two layers of nitrile coating to provide ultimate protection and gripping ability. The first layer, which is a full coating and completely waterproof, is soft and resilient allowing for excellent dexterity and great freedom of movement. The second layer, which is a palm coating, not only increases resistance to oils but has been engineered to provide maximum grip. This is achieved by infusing microfoam bubbles in to the nitrile, maximising grip especially in wet and oily conditions. This ultimately results in a glove that delivers excellent abrasion resistance, durability and a long life expectancy. The contoured design and soft, comfortable liner offers unparalleled comfort allowing for long periods of use.

Typically used for:

- Construction Work • Cable Handling
- Component Handling • Plumbing
- Drainage Works
- Oil & Petroleum Operations
- Manufacturing & Assembly
- Railway Maintenance

Case Quantity:

10 pairs per polybag
60 pairs per case
