

Ingot Heatbeater™

Ingot Heatbeater™ is a modified glass mitten with aluminised glass fabric cuff and Kevlar® felt lining that provides optimum protection from contact heat. Made from Kevlar® felt and glass, the Ingot Heatbeater™ achieves Level 4 for contact heat, withstanding temperatures of up to 500°C. Developed specially for foundry operatives, it has an aluminised glass fabric cuff offering additional protection to the forearm and helping to radiate the heat away from the glove. It has excellent tear resistance, enhancing mechanical protection and increasing durability. The felt lining ensures comfort for the wearer. Available in a choice of two different lengths, the Ingot Heatbeater™ is the ideal choice of glove in industries where there is a high risk from heat injury.

Typically used for:

- Foundry Work
- Hot Glass Handling
- Ceramics
- Heat Treatment Processes

Case Quantity:

1 pair per polybag
