

Ketochem[®]

Ketochem[®] is a lightweight ketone resistant reusable glove. Made from a unique formulation, the Ketochem[®] provides exceptional protection against a wide range of aggressive solvents. It offers excellent resistance to ketones, including MEK and acetone, as well as aromatics such as toluene. The performance level is equivalent to high performance butyl and fluoroelastomer products, at a more cost effective level. The lightweight unsupported glove construction feels like a second skin resulting in greater tactile sensitivity, yet it still manages to offer good abrasion resistance for improved durability. Unlined for easy donning, the smooth non-textured material and anatomical shape ensures comfort and flexibility, and reduces hand fatigue. These properties make the Ketochem[®] the ideal choice in environments where ketones and solvents are present.

Typically used for:

- Ink & Print Industries
- Manufacturing of Gums, Resins & Composite Material
- Printing Industry
- Manufacture of Plastics
- Handling of Ketones in Laboratories

Case Quantity:

1 pair per zip lock bag
10 pairs per case

Thickness: 0.28mm
(single wall measured at palm)

Size	Code	Length
9	KETO/09	33cm
10	KETO/10	33cm
11	KETO/11	33cm

Acetone **Caution: Avoid contact with water or water-based solutions**
