

Matrix[®] Nitri-Chem

Matrix[®] Nitri-Chem is a re-usable nitrile glove that performs well against a wide range of chemicals. Anatomically shaped for comfort, the Matrix[®] Nitri-Chem is made from synthetic rubber and contains no latex protein thus eliminating protein sensitisation for sensitive skin. It offers good abrasion resistance and has a diamond pattern on the palm ensuring a good grip in both wet and dry conditions. The soft flock lining absorbs perspiration keeping the hands cool and eases donning. In addition to these features, this glove offers good value for money.

Typically used for:

- Printing
- Agricultural Work
- Manufacturing
- General Assembly
- Cleaning & Janitorial
- Food Processing & Packing
- Local Authority Work
- Automotive Maintenance & Repair

Case Quantity:
