

## Maxima™

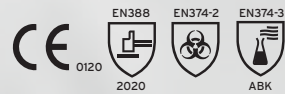

Maxima™ is a chemical resistant natural rubber glove with a flock lining. This heavy duty glove performs well to protect against a wide range of chemicals and offers good abrasion and tear resistance. Handling is greatly improved by the slip resistant finish on the palm and fingers, providing an assured level of grip in both wet and dry conditions. It is anatomically shaped and very flexible minimising hand fatigue, and the soft cotton flock lining absorbs perspiration keeping the hands cooler for longer.

### Typically used for:

- General Handling
- Fishing
- Building Work
- Local Authority Work
- Plant Maintenance
- Agricultural Work

### Case Quantity:

12 pair per polybag  
48 pairs per case

Thickness: 0.65mm  
(single wall measured at palm)
