

Nitron[®] Gauntlet

Nitron[®] Gauntlet is a heavy duty nitrile coated gauntlet with a cotton interlock liner. This synthetic rubber glove performs well to protect against a variety of chemicals including acids, alkalis and alcohols. It attains good EN388 scores enhancing its mechanical protection and durability. At 35cm in length, the Nitron[®] Gauntlet is longer than average affording increased protection to the forearm, and the granular dip finish provides a roughened surface over the entire hand area increasing the level of grip for safer handling in both wet and dry conditions. Its anatomical shape and flexibility minimise hand fatigue, and the soft cotton interlock lining absorbs perspiration keeping the hands cooler for longer.

Typically used for:

- Chemical Handling
- General Maintenance
- Metal Pressings, Fabrication
- Construction
- Waste Management
- Utility
- Engineering

Case Quantity:

12 pair per polybag
120 pairs per case
