

## Teflon Mitt™

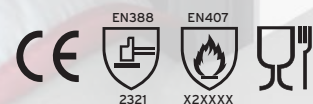

Teflon Mitt™ is a silver Teflon® coated mitt, lined with felt fabric offering contact heat protection and a non-stick surface. This heat resistant mitt has been tested to European Standard EN407 Level 2 for contact heat, providing protection up to 250°C. Also tested in accordance with EN1186, it is suitable for food contact with the Teflon® coating providing a non-stick barrier preventing oil and grease from absorbing into the glove. Available with a green or red cuff trim, it allows for colour coding to prevent contamination when dealing with raw and cooked foods. These benefits ultimately result in a product ideal for use within a food environment with potential heat hazards. The Teflon Mitt™ also offers good mechanical protection and has an extra-long cuff protecting the forearm. It can be worn on either hand extending the life of the glove and has a felt fabric lining to ensure comfort at all times.

### Typically used for:

- Bakery Work
- Cooked Meat Preparation
- Canteen Duties

### Case Quantity:

12 pair per polybag  
48 pairs per case
