

Touchstone Ultra NTM

Touchstone Ultra NTM is a seamless knitted liner made with a composite yarn of Kevlar[®] fibre and steel, with a chrome leather palm. Kevlar[®] fibre has an inherent strength that offers a high cut resistance to weight ratio, delivering exceptional performance. The addition of steel fibre that has been woven into this yarn makes the resulting material even stronger, making it ideal for applications requiring higher levels of protection such as glass and sheet metal handling. The addition of a chrome leather palm, that extends to provide a protective vein patch, offers excellent grip especially in wet and oily conditions and also acts as a liquid barrier. The elasticated knit wrist ensures a secure fit and keeps hands free from dust and debris. This unique combination of high performance properties makes the Touchstone Ultra NTM the ideal solution for many demanding applications.

Typically used for:

- Automotive Manufacturing
- Glass Handling - Wet & Dry
- Sheet Metal Handling
- Handling Stationary Blades
- Ceramics Handling

Case Quantity:

10 gloves per polybag
60 gloves per case

Kevlar[®] is a DuPont registered trademark
