

Multi-Task L™

Multi-Task L™ is a nylon mesh liner with a high grade leather palm and impact protection. The highly flexible thermoplastic rubber protection applied to the hand and fingers has been carefully engineered to safeguard from impact injury without restricting movement. The addition of a foam liner around the knuckle area adds further protection but ultimately provides optimum comfort, helping to alleviate hand fatigue. There is a leather reinforcement between the thumb and forefinger for extra protection, and spandex has been used between the fingers to facilitate flexibility and increase breathability. With a soft padded leather palm providing excellent grip and an elasticated neoprene cuff with adjustable VELCRO® wrist strap, you are assured of yet another benchmark product from Polyco.

Typically used for:

- Component Handling
- Construction Work
- General Assembly • Electronics

Case Quantity:

- 5 pairs per polybag
- 5 pairs per case

VELCRO® is a registered trademark of Velcro Industries B.V.
