

## Polyflex<sup>®</sup> Aqua

The Polyflex<sup>®</sup> Aqua is no ordinary glove - the polyurethane coating used on the palm is water-based and represents a fundamental breakthrough for the long term safety of the environment as it eliminates the use of solvents in the manufacturing process. This also makes it suitable for food contact, another milestone achievement for a dipped reusable glove. It is lightweight and spongy and has enhanced flexibility, dexterity and grip, and it is highly resistant to tear and abrasion, making for a durable and long-lasting glove. The breathable seamless knitted nylon liner ensures comfort at all times and the elasticated knitted wrist provides a secure fit and guards against ingress of dust and dirt.

### Typically used for:

- Food Processing and Preparation
- Automotive Manufacturing, Maintenance & Repair
- General Assembly
- Construction
- Finishing
- Packaging

### Case Quantity:

10 pairs per polybag  
60 pairs per case
