

Processor II™

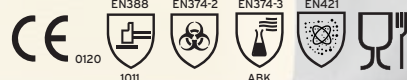

Processor II™ is a highly versatile chemical resistant glove made from natural rubber. It is unlined, making it flock and lint free and extremely sensitive. The glove has been chlorinated to harden the surface and leave it smooth to the touch; a slip resistant pattern has been applied to the palm and fingers to provide optimum grip. It is anatomically shaped for flexibility and comfort, and has a beaded cuff to prevent liquid roll-back. The Processor II™ has been sanitised containing a fungicidal and bacteriostatic agent, and has been tested in accordance with EN1186 making it suitable for food contact.

Typically used for:

- Food Processing
- Product Protection
- Cleaning & Janitorial
- Laboratory
- Electronics

Case Quantity:

12 pairs per polybag
144 pairs per case

Thickness: 0.45mm
(single wall measured at palm)

Size	Code
