

Reflex[®] G5N & Reflex[®] G5N FC

The Reflex[®] G5N is a high cut resistant glove with a foamed nitrile coating. The seamless knitted liner offers the highest level of cut resistance available, yet is extremely comfortable due to the soft finish of the yarn. It is anatomically shaped which increases flexibility and ensures that hand fatigue is kept to a minimum when worn for an extended period of time. Available with a palm coating (Reflex[®] G5N) or with a full coating (Reflex[®] G5N FC), the foamed nitrile offers added protection against abrasion, tear and puncture hazards, as well as providing excellent grip in both wet and oily environments.

Typically used for:

- Glass Handling • Steel Handling
- Automotive Manufacturing
- Sheet Metal Fabrication

Case Quantity:

10 pairs per polybag
60 pairs per case

Reflex[®] G5N FC
