

Thermatex™

Thermatex™ is a heavyweight terrycloth cotton glove that offers good insulation against heat. In addition to its insulating properties, the glove provides excellent tear resistance and has good overall mechanical protection, which also serves to increase durability. The soft terrycloth cotton fabric offers the wearer a high degree of comfort enabling prolonged use without irritation. It is available in a choice of two styles, which affords a varying degree of protection to the lower arm to suit the task in hand: a heavyweight knit wrist (32oz) and a heavyweight 40cm reverse terry loop gauntlet (34oz).

Typically used for:

- Pressings
- Handling Hot Components
- Glass Making
- Plastic Mouldings
- Foundry Work

Case Quantity:

1 pair per polybag
50 pairs per case
