

Vyflex® BOA

Vyflex Boa® is a chemical resistant seamless supported PVC glove with a soft insulating BOA lining. These PVC gloves perform well to protect against oils, acids and other chemicals. The hand area has a granular non-slip surface maximising the glove's abrasion resistance and providing additional grip for secure handling, even in wet and oily conditions. Anatomically shaped for comfort, the soft and pliable formulation results in a highly flexible glove, making it extremely dextrous and minimising hand fatigue. In addition, the BOA liner provides exceptional warmth and comfort making the glove ideal for use in cold conditions. Vyflex® Boa is anti-static, meeting the surface resistivity requirements of EN1149 part 1:1995.

Typically used for:

- Oil & Petroleum Operations
- Fishing • Agricultural Work
- General Maintenance • Outdoor Work
